KAAA Conference

**Takeaways to help
Board and Staff**

Despite overlap of two of our championships, staff was able to spend a good deal of time at the KAAA (formerly KHSADA) conference

General Commentary

Again this year, the association was asked to conduct the last work session of the conference in Louisville. This isn't always an opportunity for us to shed some light on future undertakings and changes as well as gather a tremendous amount of input for my membership.

We were also able to take part in some of the other sessions, as Mr. Collins conducted a legal session, and other staff were present at sessions where the association's mission could continually be shared.

We were also thankful to help the ADs have a session directly with one of the lead developers of the Arbiter platform, and he was able to provide a great deal of input from a packed room.
