BOARD ORDER

Upon recommendation of the Superintendent, the Board acknowledges the district's acquisition of property described in the deed as a portion of Kenvir Alley. The Board further acknowledges the existence of an underground sanitary sewer located within said property.

The district affirms that no building construction or structural footings are planned within the area of the sewer. The property will remain open green space, with the only potential improvement being a surface sidewalk that will not interfere with or impose structural load upon the underground utility.

The Board hereby authorizes and directs the Superintendent, or designee, to submit a formal petition and all supporting documentation to the **Kentucky Department of Education** requesting approval of the existing site condition and continued use of the property consistent with school facilities requirements. The district affirms its commitment to maintaining safe access and compliance with all applicable regulations.

School of Innovation Designation

A District may seek to have school(s) or program(s) listed above identified as a “School of Innovation” for the purpose of allowing the District to enter into an agreement with an education service provider to assist in the management and operation of the school(s) or program(s). Does District seek to have the school(s) or program(s) listed above identified as a “School of Innovation” for this purpose?

District must select only one of the following:

- NO.
- YES. If District selects “YES,” it must describe below how the statute or administrative regulation listed above currently prevents the District from entering into an agreement with an education service provider to assist in the management and operation of the school(s) or program(s), and attach a copy of the proposed contract with an education service provider to assist in the management and operation of the school(s) or program(s).

Waiver Justification

Describe how the District wishes to operate the school(s) or program(s) listed above and how the statute or administrative regulation listed above prevents desired operations.

The regulation requires that existing utilities need to be moved to right of ways outside the main property as to not hinder project construction. The utility in question, an existing main city sewer, is not feasible to be relocated as there is no real path for the utility. This main line will be under "green space" and if needed repairs have to be performed, excavation by city utilities would have easy access. The building construction would not be in any near vertical location of the sewer.

Describe in detail how waiver of the statute or administrative regulation listed above will improve operations or student academic achievement in the school(s) or program(s) listed above.

Waiver of this regulation would allow our district to move to the construction of new preschool facility to better serve our students and community.

Describe how waiver of the statute or administrative regulation listed above may hinder student academic achievement in the school(s) or program(s) listed above. Describe how District will address any hindrance of student academic achievement if the waiver is granted.

The regulation currently pauses the construction of the new preschool facility. The current facility has been outgrown by our current student population. This hinders in all facets of education and the growth of our preschool program.

Describe how District intends to measure the impact on students enrolled in the school(s) or program(s) listed above if a waiver is granted for the statute or administrative regulation listed above.

Waiving the regulation to allow the construction project to proceed would help to raise the enrollment of our preschool program and offer a new benchmark facility for our children to thrive in. Impact would be measured in the enrollment of our preschool program which in turn raises the enrollment of our other grade levels as our kids progress.
