

**Board Report**  
Jim Seward,  
Director of Technology  
June 2026

**Device Collection**

This was another great year in getting devices returned. Previous years we have had double digits in non returns. Last count, we are less than 6 devices and working to recover those.

**Summer School**

We have deployed our new Chromebooks to our summer school students.

**One-to-One Devices**

The 26-27 school year will have a different feel for technology. Students in K will continue to utilize iPads. Students in grades 1-12 will now be utilizing Chromebooks. Our dual credit students will be sporting new Macbook Neo's that will be Bellevue Gold, in color. We are looking forward to a successful year.

**New BMHS Keycard System**

We have been planning and preparing for the installation of new door access controls at BMHS. We plan to have this system installed and operating by July 1, 2026.

**New Districtwide Telephone System**

Similar to the keycard system, have been planning and preparing for the installation of new telephone system for our school district. This includes a

new service provider, new telephones, and new features. We plan to have this system installed and operating by July 1, 2026.

### **Summer Projects**

We have many other projects to finish but working hard to complete.

- Complete refresh of devices (clean, repair, reinstall) of student devices
- Providing 'spa' days for staff devices. Similar to a student refresh but a little more detailed.
- 12 new interactive displays for BMHS. We are replacing 'regular' TV's in the classroom with new interactive displays
- CUES project - basically a new user passwords policy for all students and staff. Statewide initiative.
- Decommisioning of Active Directory - this project is the larger part of CUES and also impacting 'spa' days for staff devices.
