Consent Agenda Item (Action Item): Soliciting letters of interest from qualified Architectural/Engineering firms for consulting and design services for the renovation of the Floyd County Area Technology Center Renovation.

Applicable State or Regulations: 702 KAR 4:160

Fiscal/Budgetary Impact: The Floyd County Area Technology Center has successfully secured approximately \$1.4 million in grant funding for critical repairs and upgrades. While this funding will help address immediate facility concerns, the age and design of the buildings continue to present challenges. Long-term investment in updated facilities remains essential to ensure students have access to safe, efficient, and industry-aligned learning environments that support workforce readiness and economic development in Eastern Kentucky.

History/Background: The two buildings that currently house the Floyd County Area Technology Center are among the oldest facilities in Kentucky still being used as Area Technology Centers. One building was constructed in 1962 and the second in 1972, making them more than 50 and 60 years old, respectively. The age of these facilities presents ongoing challenges related to infrastructure, maintenance, space utilization, and the ability to provide modern career and technical education programs that meet current industry standards and workforce demands.

Recommended Action: Approve advertising for the soliciting letters of interest from qualified Architectural/Engineering firms for consulting and design services for the renovation of the Floyd County Area Technology Center Renovation.
