

IDENTITY AUTOMATION

# RapidIdentity K-12

Next-Generation Identity & Access Management Tailored for  
Education

# RapidIdentity Baseline Services

## Lifecycle Management

Automated account creation, role-based access control, and seamless integration with SIS data sources.

## Authentication & SSO

One-click portal access with tailored authentication options including pictographs, QR codes, push notifications, and FIDO.

## Self-Service Reset

Empowers users and trusted site staff like teachers and librarians to perform instant password resets without IT intervention.

# Tailored Authentication Experiences

**Pictographic & QR Code Logins:** Designed specifically for early childhood and special education students to enable instant classroom access without typing long passwords.

**Contextual MFA for Staff:** Secure sensitive accounts with Push notifications, and adaptive multi-factor policies.

**Universal Device & Portal SSO:** Consistent login experiences across Windows, Mac, iOS, Android, and Chromebook devices.

# Zero-Day Start for Staff & Students

## Immediate Digital Readiness

Eliminate onboarding lag for newly hired staff and newly enrolled students.

From the moment an identity is provisioned in the SIS or HR system, RapidIdentity automatically creates and assigns credentials across all connected platforms.

Ensures equal access to digital learning tools from day one without burdening IT administrators.

# Maximizing Classroom Teaching Time

## Eliminating Login Bottlenecks

Password and login issues are the single largest technical disruption during classroom instruction.

By empowering teachers to reset student passwords directly in the classroom and providing age-appropriate login methods, RapidIdentity returns valuable teaching hours back to schools every week.
