Thank you!

The technology behind UniteGPS is the most advanced in the industry. Our service is provided by what is known as Software as a Service (SAAS). This means that our software is not located at your premises and never sits on your computers. Instead of our service running on servers and using up data storage at your school district, our company handles everything from our data center.

Your transportation department, school administrative staff, and parents need only log into the UniteGPS website, and everything is provided. SAAS applications in line with UniteGPS School Bus are on the cutting edge of versatility, speed and simplicity.
