

Board Report

Jim Seward, Director of Technology

August 2026

Software:

The beginning of each school year requires updating the various district software with new employees, new students and newly created classes. Databases the tech department provides requested assistance with includes: Infinite Campus, Active Directory, Food Service Mosiac, MAP Assessments, and many others.

Data Security

Data Security Document has been updated and shared with you.

Device Deployment

As we are heading back it is time to deploy devices to our students. Our dual credit deployment was a success with the new Macbook Neos. We are geared up to deploy Chromebooks and iPads to the rest of the district this month.

Student Devices

As we start this school year, all students in grades 1-12 will have Chromebooks. The exception to this is our dual credit students. Our K students will continue on iPads with the future goal of getting Chromebooks for them.

New this year is Grade 1 on Chromebooks.
