NON-COMPETITIVE DETERMINATION EXPLANATION

Describe how you determined that competitive vendor selection is not feasible?

Documentation requirement for all noncompetitive D&F transactions, including contracts and purchases of products at any dollar amount: Requisitioner must document how they determined that the vendor qualified for noncompetitive purchasing. This explanation may include documenting the efforts to find other vendors who provide a similar service/product and/or a list of services/products reviewed and the specific attribute that made the selected service/product distinctly different. This documentation must be attached to contracts during the routing process and attached to the requisition for purchases of all services/products using noncompetitive purchasing.

Requirement for all purchases of \$50,000 or more: Requisitioner must include evidence of cost center approval. This may be accomplished by attaching the Requisition to Purchase form to the Munis requisition or by attaching an approval email from the cost center head. Document negotiation efforts to receive the best price for the service/products being procured.

What specific criteria/criterion is/are necessary for this product or service?

The criteria for using Leslie Texas Consulting is based upon her past experience with Knight Middle School and the impact of her work on student results and teacher capacity. She has built trusting, collegial relationships with teachers, administrative team and even students. Her work has been so impactful that the school saw a 50% increase in proficiency in math on the 2025 KSA and preliminary data from 2026 KSA shows similar results. She has been instrumental in supporting our teachers with the HQIR implementation and internalization and ensuring that both ECE and multilingual students were receiving grade level content with quality instruction. The teachers trust her and value the expertise that she brings. These criteria support equitable access to high-quality math instruction and promote improved numeracy outcomes for every student. Her services also come at a considerably lower cost and with much higher frequency of service than other vendors who may offer similar services.

What steps did you take (i.e. research) to determine this was the only vendor available?

To determine whether this vendor will meet the needs of students, the school reviewed previous summary information to ensure it aligns with evidence-based numeracy practices and instructional goals. This process may include evaluating the vendor's research, body of work and outcomes data, reviewing program materials for alignment with high leverage coaching protocols, and assessing how the work supports diverse learners and intervention needs. Additionally, the school considered the level of professional development and implementation support provided to educators, as well as the ability to support progress monitoring and data-driven instruction.
