

Board Report

Jim Seward, Director of Technology
September 2026

Technology Activity Report

The annual Technology Activity Report has been submitted to Kentucky Department of Education. This report requires school districts to report technology expenses for the prior fiscal year. The state data is then presented to the legislature for future technology funding needs. The submission of this report is also the first step in receiving our first KETS Offer of Assistance.

Device Deployment

We had a phenomenal start to the school year with our student devices. Ms. Barrett did a great job in getting Grandview ready for the school year. She had all student devices ready and charging in the classrooms. At BMHS, multiple days of device deployment went extremely well. We are also seeing great success with the new purchase of Chromebooks for students in grades 1-12!

Cues Project - Rapid ID

As of September 3, 2026, we are completed with the state-mandated project for CUES. All password management duties are now handled with the RapidID product. This is a precursor to the state removing Active Directory.
