Nexus

Unlock the full potential of your data with Nexus. Our AI-powered decision intelligence platform offers a revolutionary approach by integrating seamlessly with your existing systems to provide instant visibility and comprehensive access to all data across your databases, tools, and documents. This unified platform aggregates data into a single, searchable repository, allows for the creation of dynamic dashboards for real-time decision-making, and acts as a fractional data analyst, proactively surfacing critical insights to district leaders.

- **Data Aggregation**

- Nexus seamlessly integrates with your existing systems, consolidating information into a single, searchable database. This advanced aggregation capability ensures that all your data is at your fingertips, ready to be queried.

- **Unified Search Engine**

- Powered by AI, Nexus offers a comprehensive search platform across all your databases, tools, and documents, enabling instant access to any information.

- **Customizable Data Nodes**

- Nexus provides specialized sections within your data for targeted access. These nodes allow administrators to tailor your database, making specific data readily accessible to authorized personnel.

- **Dynamic Dashboards**

- With the data retrieved, Nexus constructs interactive dashboards, presenting crucial information in an easily digestible format. These dashboards are not just informative but are tools for real-time decision-making.

- **Reporting and Alerts**

- Nexus creates custom reports and alerts based on data triggers within Nexus and the district's existing systems.

- **Data Agents**

- Nexus is introducing automated Data Mining as a Service, proactively analyzing district data for hidden patterns and actionable insights. These agents will continuously scan and learn from your information ecosystem, offering predictive analytics for faster, more informed decision-making.

Covington Independent Schools Proposal

Nexus is offering the following special pricing structure designed exclusively for Covington Independent Schools. This offer includes an annual rate that is highly customized to your specific needs, allowing you to experience the full benefits of our Nexus platform with a customized financial commitment.

Data Sources & Account Setup

This list is illustrative; any integration of comparable scope can be substituted. These estimated integration costs are components of your Base Subscription and are included in the annual fee — not billed separately.

Data Sources:

1. Infinite Campus

Based on expected data capacity, approximately \$4,800.00 annually

2. MasteryConnect

Based on expected data capacity, approximately \$600.00 annually

3. STAR (Renaissance)

Based on expected data capacity, approximately \$600.00 annually

4. MUNIS (Tyler)

Based on expected data capacity, approximately \$3,600.00 annually

5. Frontline

Based on expected data capacity, approximately \$3,000.00 annually

6. Google Drive

Based on expected data capacity, approximately \$2,000.00 annually

7. Clever

Based on expected data capacity, approximately \$2,000.00 annually

8. Pear Assessment

Based on expected data capacity, approximately \$600.00 annually

9. SAVVAS

Based on expected data capacity, approximately \$600.00 annually

10. Additional data source

Based on expected data capacity, approximately \$1,000.00 annually

External Data Sources, & Context Data:

1. Kentucky Public Education Data

Expected Manual File Uploads:

1. None

Data Footprint:

- Your plan includes Live Data (your “Active Data Footprint”) managed by Nexus.
- “Live Data” means actively processed, queryable data within Nexus, including continuous ingestion, transformation, indexing, and AI/analytics workloads. It is distinct from low-cost file or backup storage, which is not billed under this model.
- This includes full data capacity for the sources listed above. Nexus sizes your environment during implementation based on your district’s enrollment, data sources, and usage patterns. If your district elects to add new data sources or integrations not included in the original scope, Nexus will work with you to size and price the additional capacity before any changes are made.
- At the end of each school year, historical data transitions to cold storage. Cold storage data remains fully queryable but is no longer actively processed or transformed, keeping your live environment sized appropriately year over year.
- There are no overage charges within your scoped environment. If actual data volume exceeds our initial projections for the sources listed above, Nexus absorbs that cost for the duration of the contract term.

Data Partitioning:

- Includes unlimited distinct Data Nodes, configured to support different user groups or specific tasks.
- Each node is capable of processing and analyzing data independently.
- Flexible architecture allows for nodes to be individually trained, ensuring precision in task handling and data management, with the scalability to add more nodes as needs grow.
- Includes an unlimited number of Data Rules, configured to support Guest accounts.

Users:

- Includes 5 seats (AI Users)
 - **Platinum Seats: 5**
 - Unlimited daily chats with no usage restrictions.
 - Annual Pricing: \$999 per seat per year
 - Power Seats: 0
 - Pro Seats: 0
 - Essential Seats: 0
 - Explorer Seats: 0

Seat Expansion Options:

The Customer may expand its Nexus seat count at any time during the contract term under the following terms:

- **Group Expansion (10+ seats):** Additional seats purchased in groups of 10 or more receive a 10% discount on the applicable per-seat rate. For example, a group of 10 Essential seats would be billed at \$359 per seat per year (\$3,590 per group) instead of the standard \$399.
- **Individual Seat Additions:** Individual seats may be added at any time at the standard published rate.

User Configuration:

- Seats can be designated as Data Manager roles, providing full access to all system data, or Member roles which are configured for selective access. This access can be custom tailored to permissions for specific systems, based on your organizational needs and security protocols.
- Includes unlimited Guest accounts which are configured for selective access, but unable to access AI chat functionality.

Implementation and Support

Program Setup

- Development, configuration, and setup is provided by dedicated Nexus staff.
- Includes an unlimited number of offsite trainings for key users and ongoing dedicated Customer Success.
- On-site, in-person training sessions are available at no additional cost beyond travel reimbursements. Customer shall reimburse Vendor for reasonable travel expenses not to exceed \$2,500.00 per session.

Professional Development & Training

Nexus implementation includes a structured professional development program designed to build internal capacity and solve real problems from day one. Rather than generic software training, PD sessions function as collaborative consulting engagements — working with your teams to define KPIs, configure compliance reporting, and align the platform to your district's strategic priorities.

- **On-Site Sessions:** 60–90 minute working sessions with different stakeholder groups throughout the day. Sessions begin with central office leadership to establish district priorities and reporting expectations, then extend to department-level and building-level staff as adoption scales.
- **Phased Rollout:** Training is sequenced intentionally — central office first, then departments, then campuses — so that leadership defines what each group sees and does before they are onboarded.
- **Flexible Scheduling:** Sessions can be structured around your existing meeting cadences — cabinet meetings, PLCs, admin team meetings, department check-ins — minimizing disruption and embedding Nexus into workflows your teams already follow.
- **Virtual Workshops & Office Hours:** Ongoing virtual sessions provide continued support beyond on-site visits, including live Q&A, use-case walkthroughs, and advanced feature deep-dives.
- **Async Resources:** A full library of how-to guides, recorded walkthroughs, and documentation is provided so users can self-serve between sessions.
- **Scope Scales with Adoption:** The number of on-site days and sessions scales with your selected adoption option, ensuring every user group receives hands-on support.

90 Day Usability and Impact Clause

- The first 90 days will be used to verify data flow from the first integration of the Customer's choice.
- For purposes of this section, "successful integration" is defined as the confirmed ability to ingest, normalize, and return queryable data from the designated source system.
- This termination right applies solely to a verified failure by Nexus to complete the agreed-upon integration and does not extend to general product dissatisfaction, changes in district priorities or funding, or dissatisfaction with systems or features outside the scope of the initial integration.
- If Nexus is unable to successfully integrate with this system within 90 days, Customer may terminate the contract with no further financial obligation and a full refund of implementation costs.
- This does not allow termination for general product dissatisfaction.

Ongoing Support & Success

- Included in the annual subscription is an unlimited number of offsite trainings for key users and ongoing dedicated Customer Success.
- For the first 3 months, we will schedule periodic bi-weekly reviews to provide updates for system utilization and to provide recommendations as appropriate.
- Quarterly reviews to provide updates for system utilization.

Referral Credit System

- For each referred district that signs a contract, the Customer receives a 5% credit toward their next payment, if the referred district's contract value is greater than the credit amount.
- Maximum of 20% total credit per year.

Standard Pricing

On-Site Training Travel (if applicable): Up to \$2,500.00 USD

¹ Off-site training & Customer Success are included as part of the Annual Subscription at no additional cost.
² On-site, in-person training sessions are available at no additional cost beyond travel reimbursements. Customer shall reimburse Vendor for reasonable travel expenses not to exceed \$2,500.00 per session.

Base Subscription Includes dedicated closed AI Engine & Azure resources. 1-year term.	\$18,800.00 USD/yr
User Licensing 5 Platinum Seats. Unlimited Guest accounts. 1-year term.	\$4,995.00 USD/yr
Annual Fee	\$23,795.00 USD

Pricing is effective for 45 days from the date of the proposal.
