Incident	Total Incidents
Bus Incident	7
Disrespectful Behavior	3

Additional Data

Summary

ACPC's fall assessment data present a positive picture overall, with encouraging increases in MVPA projected proficiency compared with last fall. Schoolwide reading increased from 39% to 48%, with gains across all tested grade levels, including a 16-percentage-point increase in first grade. Math projected proficiency increased from 30% to 34% overall, supported by improvements in first and second grades.

FastBridge results provide additional information about students' foundational skills, with approximately 46% of students at or above benchmark in reading and 66% in math. These results give us reasons to celebrate while helping identify where additional support is needed. Teachers will use multiple measures of student learning to guide small-group instruction, respond to skill gaps, and monitor mastery of grade-level standards, with continued attention to third-grade math.
