

POLICY ISSUES FOR AD HOC FOOTBALL DISCUSSION

1. Schools being allowed to play up.
 - a. How far (if limited)
 - b. If schools play up, do you compensate by moving lowest school down?
2. 32 vs 16 in smallest and largest class
 - a. Byes in early rounds if teams drop out
3. Enrollment Adjustments / New Schools
 - a. Nelson County split (new school 2012 season)
 - b. McCracken consolidation (new school 2012 season)
4. Alignment Period
 - a. 2 year ?
 - b. 4 year ?

FOOTBALL ALIGNMENT INFORMATION

REMINDER – ATTACHED IS THE LIST OF TEAMS IN RANKED ORDER

Column headings – SD (type of school), SCHOOL, SCS (short name for maps), TZ (time zone), ALI (2007 alignment position), CY4BOY (Current year, 4 grade boy enrollment), PY4BOY (prior year), AVG2YBOY (Average of the two years, 2008-09 and 2009-10), Double (Did we double enrollment, no longer relevant since we use boys only), EG (enroll factor if we did double), N_LAT1 (latitude of school), N_LON1 (longitude of school), RK (rank in average 4 year boys order), OPT 1 (Option 1 per below), OPT2 (Option 2 per below), OPT 2 (Option 3 per below)

I have presented you with three options (in the last three columns). All three (3) involve six classifications:

- Option 1 places 32 teams in Class 6A and the other 5 classes are evenly divided (two schools have equal enrollment at the bounds of class 2A and 3A)
- Option 2 places 32 teams in Class 6A and 32 teams in Class 1A. Those are the classes where the factors of enrollment are magnified the most. The other 4 classes are evenly divided (two schools have equal enrollment at the bounds of class 2A and 3A)
- Option 3 places an equal number of teams in each class. Two schools have equal enrollment at the bounds of Class 4A and 5A.
